

One Rifle for all Conditions

M-1500

HowaTM
Precision Rifles & Barreled Actions

Howa HOGUE® .375 Ruger

The newly designed powerhouse caliber from Ruger and Hornady, has a cartridge case that is slightly larger in diameter than a .30-06, but shares the same overall case length. This means the new rifle caliber/rifle provides shooters with a standard length action, shorter bolt stroke and an easier feed, while producing better ballistics than the .375 H&H magnum.

Howa HOGUE®

The duo that started it all – the Howa barreled action and the Hogue Overmolded® rifle stock. Now, this configuration is the backbone of the Howa rifle line in 2010. Howa M-1500 rifles are well known in the shooting community for their accuracy and ability to hold up under the toughest of conditions.

Add to that the Hogue Overmolded® stock features a comfortable, soft grip to reduce shooting fatigue and still provides a positive grip surface in all weather conditions. The Hogue stock will not harden with age, and is impervious to gun solvents and

gun oils. It is built with a fiberglass reinforced skeleton and pillar bedding for strength and accuracy, allowing the barrel to free-float. The stock also has a varmint style forend, built-in swivel studs and a famous Hogue recoil pad.

With the Howa Hogue you have a great shooter, combining supreme accuracy and safety with comfort and great handling, right off the shelf!

Howa HOGUE® Heavy Barrel Varminter

The Howa Heavy Barrel Varminter model is built with a 20" Heavy Barrel, and is offered in .22-250 Remington, .223 Remington or .308 Winchester, three highly popular varmint calibers. The short, heavy barrel provides ease of maneuvering and excellent heat dissipation.

HOWA Ranchland

The Ranchland Compact combines all of the best features needed in a compact, all-purpose "truck gun". The Ranchland Compact is built on the tough and reliable Howa barreled action that features a forged steel, flat bottomed receiver; large recoil lug and hammer forged barrel.

On top of that is a forged, one-piece bolt with two locking lugs, an M-16 style extractor and three position safety. All of this mounts in your choice of an OD Green, Coyote Sand or Black Hogue Overmolded® stock.

Howa European Varminter Supreme & Thumbhole Varminter Supreme

Howa European Thumbhole Varminter and Varminter Supreme rifles take performance to new heights. Built around the proven M-1500 action, these rifles have 24-inch hammer-forged bull barrels with recessed muzzle crown in either non-glare blue or matte stainless steel. The M-1500's acclaimed trigger adjusts for sear engagement and weight of pull. A three position safety allows safe single-loading and secure bolt lock-down. Recoil pads and swivel studs are standard.

The European Varminter Supreme stock is designed with a raised comb and rollover cheekpiece, a full pistol-grip with

palm-filling swell, a broad beavertail forend and vented stock for barrel cooling.

The European Thumbhole Varminter adds a high, straight comb and a more vertical pistol grip that's ideal for shooting off a bench or rest. For hunting, pest control, or match competition, you can't go wrong choosing a Howa M-1500 European Varminter Supreme rifle. The Howa European Varminter Supreme and European Thumbhole Varminter Supreme rifles come in Nutmeg (brown) and Pepper (gray) laminated stocks.

American Walnut Hunter

All of the features that made Howa great, plus an American walnut stock that offers a Monte Carlo rollover comb. Barrels are free floated for maximum accuracy.

Available starting autumn 2011

NEW

Detachable Magazines

These new detachable polymer magazines are available for .223 and .308 calibers, with .22-.250 coming soon! Available as an aftermarket conversion only (5 and 10 rounds), these new magazines come with a special trigger guard/mag. well housing that replaces the existing floorplate of your Howa M-1500.

NEW

Howa Thumbhole Sporter,
Woodland

Also new for 2010 is a completely redesigned wood laminate sporter stock. A cousin to the new Thumbhole Varminter, this stock is ambidextrous with the same open thumbhole design. The large thumbhole accommodates the heaviest hunting glove while providing unequalled stability and handling control. The unique features and design of the thumbhole stock allows sport shooters and hunters improved accuracy, quicker target acquisition, steady firearm control and the ability to comfortably use their rifles in a variety of shooting positions. Available in Nutmeg or new Woodland laminate colors.

Howa Thumbhole Sporter

Howa Talon Sporter, black

BLACKHAWK!

Howa Thumbhole Varminter

Replacing the old TH Varminter Supreme for 2010 is the Howa Thumbhole Varminter. This tough, laminated stock is ambidextrous in design. The new open thumbhole design easily accommodates even the biggest hands and heaviest hunting gloves. The vertical pistol grip affords comfort and positive handling, while this hand position gives better control and allows for better recoil response. The forend is massive for stability and balance when target shooting. Equipped with large vent holes, the forend dissipates

barrel heat quickly for sustained, on target accuracy. These rifles come with 24", heavy barrels on proven Howa actions. Available in Nutmeg or new, Woodland stock color. Still available for 2010 is the Howa Varminter Supreme in Nutmeg or new Woodland colors. The Varminter Supreme features a raised comb with rollover cheekpiece, a full pistol grip with palm swell, broad beavertail forend and vents for cooling.

Howa Talon Thumbhole Up to 70% Recoil Reduction

The new HOWA TALON Thumbhole Rifle combines the performance features of a thumbhole stock with the award winning Axiom Rifle Stock design. Utilizing the new Two-Stage dual Knox recoil compensating systems, the Axiom TH has the ability to reduce felt recoil of even the most potent rifle rounds by up to 70%. Whether it's hard hitting big game ammunition or shoulder pounding predator ammunition, the new Two-Stage Recoil system makes all rifle calibers easy for any shooter to handle!

The HOWA TALON Thumbhole Rifle Stock's polymer and alloy construction makes it durable, reliable and built to last. The

unique features and design of the thumbhole design allows sport shooters and hunters improved accuracy, quicker target acquisition, steady firearm control and the ability to comfortably use their rifles in a variety of shooting positions. Deer, elk and predator hunters alike will find their target hit ratios improving as flinching and recoil anticipation dramatically decreases.

Designed with a rifle hunter in mind, and practically devoid of any harsh recoil, the HOWA TALON is an ideal choice for those shooters looking to substantially improve the performance of their bolt action rifles. Soft on the shoulder, hard on the target!

The Howa Axiom is not available in all countries!

Howa Axiom Up to 70% Recoil Reduction

The Howa/Axiom uses a cam and spring absorber in the pistol grip & another heavy spring in the stock tube. Both systems are separate units from the forend, allowing the stock to absorb recoil on impact. The Howa M-1500 offers as standard many features found in much more expensive rifles, like a forged receiver and forged, one-piece bolt that are both ported for safety, a three position safety, a one-piece guard and magazine box with hinged floor plate. The bolt also features two locking lugs and an M-16 style extractor.

The Howa/Axiom features:

- Rugged lightweight synthetic construction
- Instantly adjustable length-of-pull from 11.5" to 15.5"
- Two recoil suppression devices for maximum recoil reduction of up to 70%
- Completely free-floated barrel for maximum accuracy
- CNC milled to specifically fit the Howa M-1500 action
- Available with Nikko Stirling scope package

These rifles are ideal for bench rest shooting or varmint/predator hunting. Five varmint calibers are available in the 24" Heavy Barrel and 3 calibers in the 20" Heavy Barrel version.
